- Medical affairs

AGENCY SERVICES

We proudly partner with agencies across pharma, device, and biotech to deliver custom visual assets that drive education, engagement, and marketing.

From storyboard iteration to MLR approval, we work seamlessly at every stage to support and extend what great agency teams can do for their clients.

HEAR FROM OUR TRUSTED CLIENTS

"Medmovie provides more than just 3D Animation services. *They analyze our complex teaching objectives and develop highly effective visual strategies based upon those objectives. They serve as an important part of the extended GE team, consulting with our engineers, clinical people, and marketing staff worldwide. The result is a powerful set of visual sales tools that cut across language barriers; help train our sales force and sell our product."*

Susan Floer
Global Product Manager, GE Healthcare

"Medmovie didn't just illustrate a concept—*they brought it to life with a storytelling approach that made complex science both engaging and accessible... we were able to repurpose the visuals into a full library of brand assets. If you are planning to develop a medical animation or illustrations of any kind or scope, I absolutely recommend the Medmovie team."*

Anna Vorobeva
Associate Marketing Director, Recordati Rare Diseases
